

# ASME HISTORY AND HERITAGE COMMITTEE

Share your pride in the significant history and heritage of your profession.  
Let the world know how mechanical engineers have beneficially influenced human history.

## What Can You Do?

- Promote discussion in your section to select an artifact for designation as a Historic Mechanical Engineering Landmark. *Landmark ceremonies are great social occasions for sections and great opportunities for highly favorable publicity for our profession.*
- Nominate a candidate for the Engineer-Historian Award—someone who has published outstanding works dealing with the history of mechanical engineering.
- Organize field trips to Historic Mechanical Engineering Landmarks in your section's geographic area to determine their condition. *Provide your findings to ASME Headquarters.*
- Submit an article for publication in the History & Heritage newsletter, "On the Shoulders of Giants"
- Expand the Oral History Program by interviewing prominent engineers in your section's area.
- Appoint a History & Heritage Chair to lead the effort for your section. *The National H&H Committee and ASME staff will assist section chairs with these activities.*
