

Engineers Without Borders Affinity Group

Promoting EWB awareness and participation in EWB activities

ASME and EWB

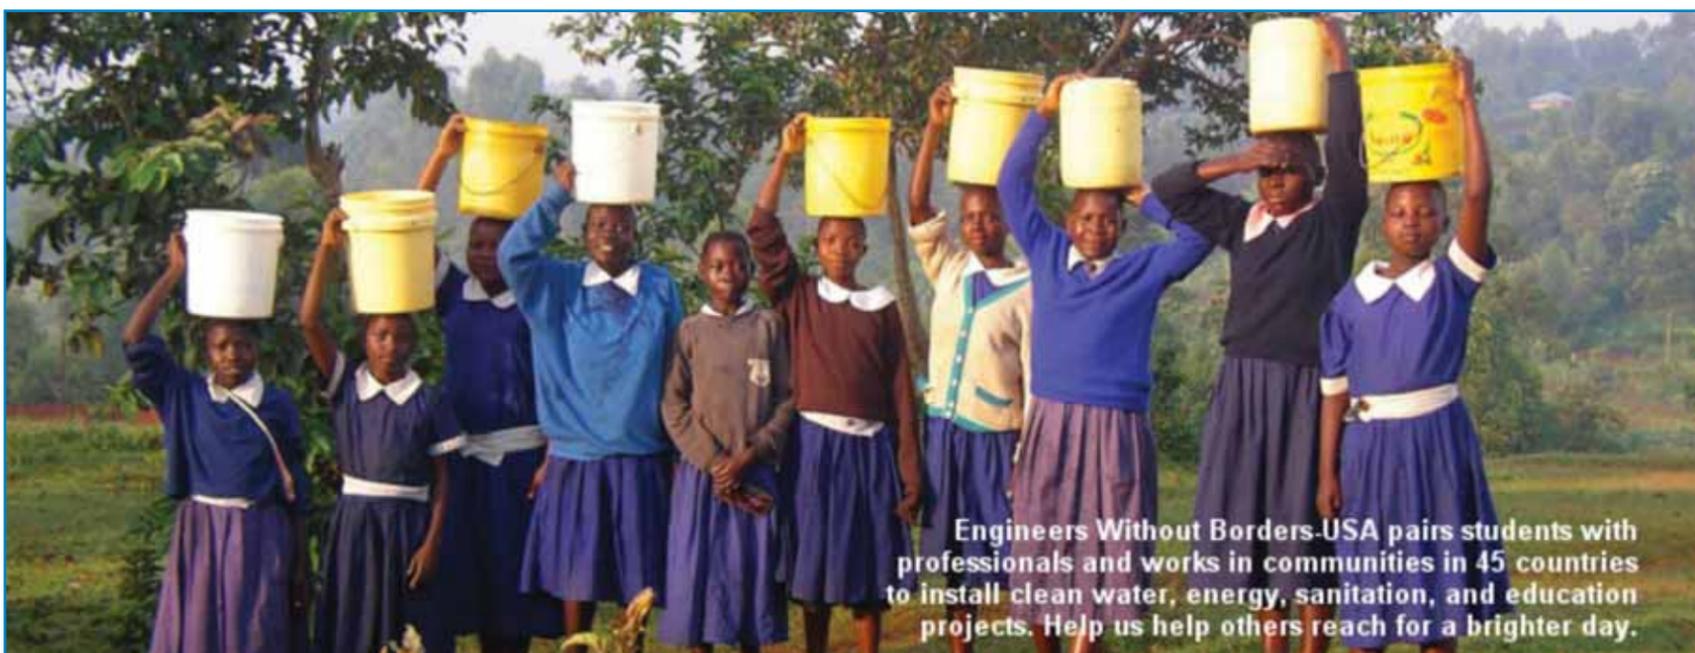

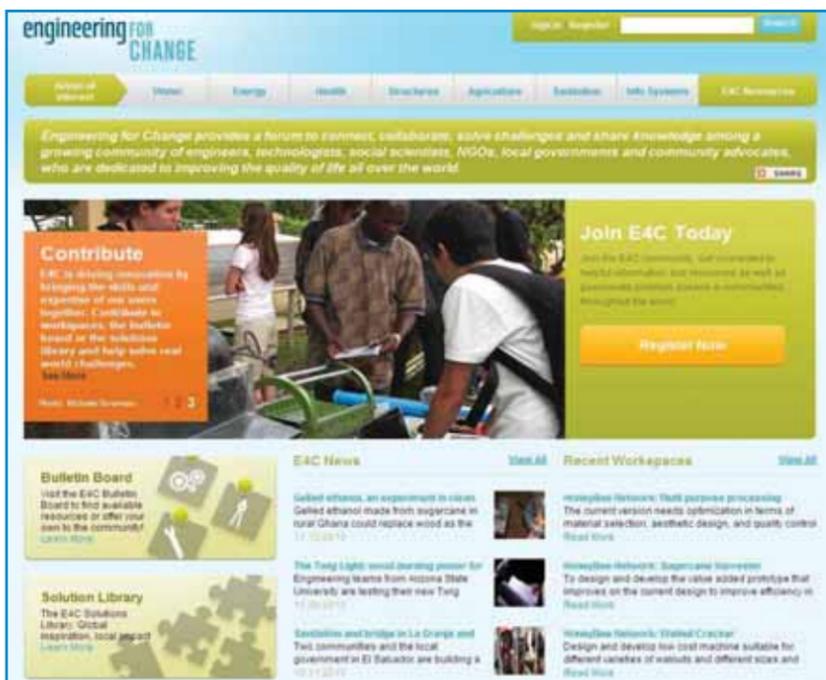

- ASME and EWB-USA announced an enhanced strategic partnership in January to leverage each organization's strengths to benefit future joint initiatives and objectives. ASME will be established as an EWB-USA Principal Partner.
- The EWB Affinity Group supports this partnership through coordination of joint activities, participation in the Engineering for Change Community, and increasing awareness and involvement among mechanical engineers. Join the group and learn more about upcoming events and participate in discussions. To join go to the ASME PeerLink website and register.

How can I participate in the EWB Affinity Group?

- Join the Engineering for Change Community: www.engineeringforchange.org
- Join discussions on the ASME / EWB Groups on Facebook, LinkedIn, and the ASME Peerlink sites.
- Attend an event at an ASME conference.
- Attend a meeting of your local student/professional EWB Chapter
- Contact and share ideas with current EWB Affinity Group members.

Engineers Without Borders-USA pairs students with professionals and works in communities in 45 countries to install clean water, energy, sanitation, and education projects. Help us help others reach for a brighter day.
