Committee on Early Career Development Projects

“Increasing Early Career Engineers’ awareness of both global and local trends and opportunities in the engineering profession”

Aaron Ryan
Pella Corporation
CECD Chair

Anita Rebarchak
Pratt & Whitney
CECD Vice Chair

Cheryl Hasan
ASME
Manager, Early Career
Development

What we do:

- Publishing—ME Today Online Magazine
- Early Career Events—Content Development for Online and Onsite
- Strategic Partnering—Increase global impact on Early Career Engineers

What we are about:

- To encourage and provide early career professionals the technical resources to continue to update their competence and keep pace with the demands for technical excellence.
- To advance the career development of early career professionals by providing learning resources, opportunities for leadership and participation, mutual learning and support, and access to senior leaders in the profession.

About the committee:

- A standing committee under the Center for Career and Professional Advancement Board.
- The Committee on Early Career Development (CECD) is chartered with the development, management and implementation of products and services serving the early career professional.
- The CECD is a motivated and diverse group of young engineer professionals that want to make a difference in engineering and society through the development of high quality programs, media, publications and events for Early Career Engineers worldwide.

If you are interested in working with the CECD, please contact us at earlycareerengineers@asme.org
