

Mission: Promote, encourage, and recognize the advance of Art, Science, and Practice of Mechanical Engineering in the field of Internal Combustion Engines.

Vision: To be a prominent information resource by providing a forum for the documentation, worldwide dissemination, and recognition of the technical achievements and ideas of the people engaged in internal combustion engines.

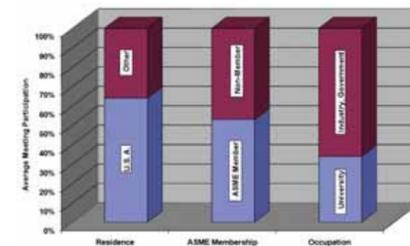

Conference Model

- **Target Audience:** engineers, scientists, professors, managers, technicians, students, and policymakers dealing with internal combustion engines
- **Target Areas:** power, marine, industrial, on- and off-highway, locomotives
- **Conferences:** annual (North America), registration fee (~\$500) includes conference proceedings, breakfasts, lunches and coffee breaks
- **Globalization:** one conference outside USA every 3 years
- **Local Hosts:** members from industry, government and academia
- **Schedule:** 2 days of technical sessions, 0.5 day for technical tour
- **Technical Tours:** engine manufacturing facilities, research facilities
- **Student Involvement:** reduced registration fee to encourage attendance
- **Sponsorships:** industry partners
- **Exhibitors:** small tabletop and corporate exhibits
- **Social:** spouses' tours, reception, awards banquet, chair's hospitality suite
- **Recent Initiatives:** undergraduate student papers, engineering application articles to increase industry participation, fast-track publication of high-quality conference papers in JEGTP
